400 COFFEE

Legal Document Pack

VERSION 1.1 | 06 NOVEMBER 2026

400 COFFEE

Legal Document Pack (India-oriented Draft Templates)

Contract and policy checklist; requires review by qualified Indian counsel

Document status: Professional working draft for stakeholder review. Open decisions and assumptions are explicitly identified.

Contents

1. Important legal status

2. Document checklist

3. Draft clause prompts / issues to settle

4. Signature readiness checklist

1. Important legal status

Draft only This pack is a drafting framework and issue checklist, not legal advice, not a legal opinion and not ready for signature. Applicable law, parties, tax status, data roles and commercial terms must be reviewed by qualified Indian counsel and tax professionals.

Assumed relationship Working assumption only: Inferra Software is the SaaS/software supplier and 400 Coffee is the pilot customer. Confirm exact registered legal names, entity types, addresses, GSTIN/PAN where appropriate, authorized signatories and whether this is a paid pilot.

No invented details All bracketed fields must be completed from verified party and business information. Do not sign with blanks or unreviewed schedules.

2. Document checklist

A. Master SaaS Services Agreement Parties; definitions; service description; account responsibilities; subscription term; fees/taxes; acceptable use; support; service availability; confidentiality; IP; customer data; security; warranties/disclaimers; liability cap/exclusions; indemnities; suspension; termination; transition; governing law; dispute resolution; notices.

B. Pilot Order Form / SOW Pilot scope, outlets, users/devices, modules, deliverables, milestones, acceptance criteria, dependencies, customer obligations, exclusions, fees, payment milestones, change control and sign-off.

C. SLA and Support Policy Support channels/hours, severity definitions, response targets, escalation, planned maintenance, incident communications, exclusions, service-credit approach if any, backup/restore commitments and measurement method.

D. Data Processing Addendum Controller/processor role mapping; processing purpose; data categories; data subjects; instructions; confidentiality; security measures; subprocessors; breach assistance; data subject requests; audit; retention/deletion; cross-border transfers if any.

E. Privacy Notice Data collected; purpose and lawful basis; customer/staff rights; retention; sharing; contact/grievance route; cookies/analytics; security; changes; children/minors handling if relevant.

F. Acceptable Use Policy Prohibited use, account security, unlawful content, abuse, reverse engineering limits subject to law, service protection, suspension and appeal/contact process.

G. Subscription, Billing & Cancellation Terms Plan limits, billing cycle, taxes, renewals, payment failure, suspension, upgrade/downgrade, cancellation, refunds, price changes and data export window.

H. Confidentiality / NDA Confidential information, permitted use, exclusions, safeguards, compelled disclosure, return/destruction, term and remedies.

I. IP Assignment / Contractor Agreement Work product ownership/assignment, pre-existing IP, open-source use, moral rights to extent permitted, confidentiality, security, deliverable acceptance, payment and exit obligations.

J. Pilot Acceptance Certificate Delivered modules, test evidence, known defects, training, acceptance/rejection period, remediation and authorized sign-off.

K. Data Retention & Deletion Schedule Data class, purpose, retention period, deletion trigger, backup expiry, legal hold, export format and verification.

L. Security & Incident Annex Access controls, encryption, vulnerability handling, patching, backups, logs, incident notification cooperation, forensic preservation and business continuity.

3. Draft clause prompts / issues to settle

Scope and change control Define included modules and explicit exclusions. Any change to integrations, devices, reports, tax rules or custom workflows requires written impact estimate and approval.

Customer responsibilities Provide accurate menu/prices/tax instructions, authorized UPI merchant access, staff participation, device/network readiness and timely acceptance feedback.

Payment status disclaimer For static UPI QR, platform does not independently receive bank confirmation. Staff verification is required unless an approved provider integration is contracted and tested.

Data ownership Customer retains rights in customer business data. Supplier retains platform, generic software, tools and pre-existing IP. Custom work ownership/licence must be explicitly negotiated.

Service levels Do not promise 24×7 support, uptime or recovery targets unless infrastructure, staffing, exclusions and remedies are priced and operationally supported.

Liability Negotiate cap, exclusions, direct-loss scope, confidentiality/security carve-outs and indemnities with counsel; do not copy a generic cap without considering data and payment risks.

Termination and exit Define data export, access wind-down, deletion schedule, transition assistance, unpaid fees and treatment of backups.

Indian compliance review Counsel/tax professional to assess applicable data protection/privacy requirements, IT/security rules, GST invoicing, consumer protection, electronic records, employment/contractor issues and any food-business obligations that fall on the café rather than software supplier.

4. Signature readiness checklist

Identity Verified legal entity names, registration details, addresses, GST/tax identifiers and authorized signatories.

Commercial Final quote, taxes, payment milestones, recurring charges, maintenance, third-party costs and expense approvals.

Technical Data map, hosting location, subprocessor list, security annex, backup policy, incident contacts and support scope.

Operational Acceptance tests, service hours, training, escalation, refund/payment verification responsibilities and exit process.

Legal Counsel review completed; schedules filled; conflicting terms reconciled; version and signature date recorded.

VERSION 1.1 — CUSTOMER EXPERIENCE ADDENDUM

Version 1.1 addendum — 06 November 2026. This addendum supersedes any earlier customer-facing UX description that implied a conventional QR menu/dashboard as the primary customer experience. The immersive Virtual Café is the approved customer-side direction. Existing staff POS, KDS, owner and platform-admin interfaces remain separate workstreams and are not redesigned by this customer-side change.

7.1 Customer-facing UX and consent addendum

Before production, obtain legal review of customer terms, privacy notice, data retention, consent language, WhatsApp transactional messaging templates, payment disclosures, refund/cancellation rules, menu allergen claims and tax invoice content. The customer experience collects name and mobile only for stated operational purposes; provide a separate optional marketing consent. Do not preselect consent. The app must explain whether an order is awaiting cashier acceptance, accepted, unpaid, paid or refunded accurately.

7.2 3D assets, media and brand rights

Confirm ownership/licensing for café photography, food imagery, fonts, music, 3D models, manager character design, animations and environment assets. Ensure third-party asset licences permit commercial SaaS use and distribution. No stock watermark or unlicensed brand likeness. Obtain consent/rights for any human likeness used in the manager character.

7.3 Existing legal pack boundary

This UX addendum does not convert draft legal templates into legal advice or signature-ready instruments. India-specific privacy, consumer, payment, GST/tax, messaging and data-protection obligations must be reviewed by qualified counsel and relevant payment/messaging providers before launch.
