Commercial, Pricing, Quote & Maintenance

VERSION 1.1 | 06 NOVEMBER 2026

400 COFFEE

Commercial Proposal, Pricing, Costing & Maintenance

Illustrative project economics and quote framework — editable assumptions, not a binding offer

Document status: Professional working draft for stakeholder review. Open decisions and assumptions are explicitly identified.

Contents

1. Commercial basis

2. Cost model assumptions

3. Illustrative quote scenarios

4. Recurring application pricing

5. Maintenance and support

6. Miscellaneous and excluded costs

7. Proposed payment milestones

8. Recommended commercial presentation

1. Commercial basis

Proposal model Separate one-time implementation/pilot delivery from recurring SaaS subscription, hosting, third-party services and optional maintenance/support.

Important All values below are planning estimates in INR, excluding GST unless stated. They are not vendor quotes. Replace assumed effort/rates with confirmed staffing, hardware, cloud and tax inputs before issuing a binding quotation.

Scope basis Pilot Release 1: POS, dine-in/takeaway, customer QR, cashier acceptance policy, split beverage/food KDS, manual UPI verification, bills, shifts, dashboard, audit and deployment. Production SaaS hardening is a separately estimated stage.

2. Cost model assumptions

Delivery effort Illustrative 12-sprint baseline; estimated 1,250 person-hours across product/analysis, UX, backend, frontend, QA, DevOps/security and delivery management. Validate against actual staffing and scope.

Blended delivery rate Illustrative ■1,200/hour blended internal cost assumption. This is a modelling input, not a market quote or employee salary calculation.

Base delivery cost 1,250 × ■1,200 = ■15,00,000.

Contingency 15% of base delivery cost = ■2,25,000, for integration uncertainty, rework and pilot hardening.

Direct project cost Illustrative ■17,25,000 before hardware, travel, taxes and external vendor charges.

Other project expenses Provisional allowance ■1,00,000 for project-specific tools, deployment setup, test devices/travel and miscellaneous costs; replace with actuals.

3. Illustrative quote scenarios

Target quote ■25,00,000 one-time implementation, excluding GST and customer-purchased hardware/third-party charges. Against the illustrative ■18,25,000 direct cost, gross contribution is ■6,75,000 (27.0% of selling price).

Negotiation buffer Indicative opening quote ■27,50,000. A 9.1% negotiation movement reaches ■25,00,000. Do not discount below the approved floor without re-costing.

Illustrative floor ■22,50,000 minimum one-time price under these assumptions. Contribution ■4,25,000 (18.9% of selling price) before corporate overhead, financing, tax and unpriced risk. This is not guaranteed net profit.

Cost-plus formula Selling price = total delivery cost ÷ (1 – target gross margin). At ■18.25L cost and 27% target margin, price ≈ ■25.00L.

Scope control If price is reduced, reduce scope, support duration, customizations or delivery risk proportionately. Do not keep full scope and silently absorb cost.

4. Recurring application pricing

Starter Indicative ■999/month/outlet: POS, menu, basic reporting, limited staff seats. Feature/usage limits to be finalized.

Growth Indicative ■1,999/month/outlet: Starter plus customer QR ordering, split kitchen stations, payment exception workflows and enhanced reports.

Pro Indicative ■3,999/month/outlet: Growth plus advanced analytics, priority support and multi-device/role controls, subject to defined limits.

Commercial caveat These are willingness-to-pay hypotheses, not validated prices. Conduct 400 Coffee pilot interviews and compare support/hosting cost per outlet before launch.

5. Maintenance and support

Included warranty Proposed 30-day defect warranty after pilot acceptance for defects against agreed scope; exclude new features, third-party outages, customer configuration errors and hardware failures. Confirm contract language.

Managed support option Illustrative ■35,000–■60,000/month depending on support hours, response targets, release cadence and included engineering capacity. Price only after support model and expected ticket volume are defined.

SaaS operations Hosting, monitoring, backups, security updates, domain/certificates, email/SMS/WhatsApp, observability and payment-provider charges are separate pass-through or included line items depending on plan.

Maintenance work Bug fixes, dependency/security updates, compatibility fixes, backup/restore checks and minor operational improvements. New modules and material enhancements are separately scoped.

6. Miscellaneous and excluded costs

Hardware Customer-funded: cashier tablet, kitchen display/tablet/monitor, stands, chargers, router/network improvements, optional thermal printer and paper. Obtain local supplier quotes and test compatibility.

Cloud Compute, managed database, backups, storage, CDN, logs/metrics, bandwidth and staging environment. Cost depends on region, availability, retention and usage; obtain cloud calculator estimate.

Messaging SMS/WhatsApp/email fees and provider setup; billed by usage or contracted bundle.

Payments Merchant MDR/UPI commercial terms, bank/provider integration, webhook/API charges and refunds are subject to provider agreement. Static QR manual verification has no automatic reconciliation promise.

Taxes and legal GST and other applicable taxes, legal counsel, accounting/tax advice and statutory registrations are not included in the illustrative quote.

Travel/training On-site travel, accommodation, extra training and after-hours deployment support require pre-approval.

7. Proposed payment milestones

Milestone A 30% on contract and kickoff.

Milestone B 25% after POS/catalog and order workflow demo.

Milestone C 25% after split KDS, QR and payment verification UAT.

Milestone D 20% after pilot deployment, training and acceptance.

Safeguard Tie milestone acceptance to objective evidence and provide a defined review period. Any holdback or acceptance deemed approval must be reviewed by counsel.

8. Recommended commercial presentation

Client-facing Present implementation as a fixed-scope pilot with assumptions, exclusions, milestones and change-control. Present SaaS subscription and support separately.

Internal floor Do not disclose internal cost, contribution or negotiation margin in the customer quote. Maintain a separate internal costing workbook.

Decision needed Confirm whether the commercial buyer is 400 Coffee, its building/operator, or another legal entity; confirm Inferra Software as supplier; validate taxes and contract entity before final quote.

VERSION 1.1 — CUSTOMER EXPERIENCE ADDENDUM

Version 1.1 addendum — 06 November 2026. This addendum supersedes any earlier customer-facing UX description that implied a conventional QR menu/dashboard as the primary customer experience. The immersive Virtual Café is the approved customer-side direction. Existing staff POS, KDS, owner and platform-admin interfaces remain separate workstreams and are not redesigned by this customer-side change.

8.1 Customer-side immersive experience scope clarification

The customer-side scope now includes an immersive café entrance, 3D manager character, camera choreography, diary-style menu, product customization, basket, guest checkout, review, payment-method handoff, bill payment lookup, order confirmation and WhatsApp integration. This is materially more than a conventional QR menu page. Estimate and quote must separately identify 3D modelling/rigging/animation, environment assets, optimization/fallback, menu photography/content, payment-provider integration, WhatsApp BSP fees, hosting/CDN and ongoing asset maintenance. Existing commercial figures are illustrative only and must be re-estimated against this expanded scope before any binding offer.

8.2 Client responsibilities and exclusions

Client must supply/approve final menu and prices, product descriptions, imagery or photo shoot access, logo/brand assets, operating rules, fulfilment/pickup instructions, payment merchant account/provider credentials, WhatsApp Business account/template approvals, privacy/terms content and nominated acceptance testers. Third-party fees, taxes, payment charges, hardware, photo/3D asset licensing and messaging charges must be disclosed separately. Production payment and WhatsApp capabilities are conditional on provider onboarding and approvals.

8.3 Acceptance and change control

Commercial acceptance must be tied to the approved journey, screen inventory, integrations, performance/accessibility criteria and release gates. Any change to manager realism, scene complexity, languages, menu content volume, loyalty, table service, multi-outlet, payment provider, WhatsApp template count or additional channels must be assessed through written change control. Do not represent illustrative UI screenshots as proof of completed production functionality.
